

How effective is Engineering Possibilities in College (EPIC) in encouraging students to go to college/engineering?

Kathy Chen, Ph.D., College of Engineering - Materials Engineering Department

Lizabeth Schlemmer, Ph.D., College of Engineering - Industrial & Manufacturing Engineering Department

Our names are Kathy Chen and Liz Schlemmer, and we are engineering professors at Cal Poly, where the EPIC (Engineering Possibilities in College) camp is being hosted.

We are asking you to take part in this research study because we are trying to learn more about the impact of the EPIC camp. We want to see if EPIC does a good job teaching campers about engineering and college.

If you agree, you will be asked to complete two surveys: one at the beginning of EPIC and the second after the camp is over. You be asked some questions about engineering and college. Answering these questions will take about 15 minutes for each survey.

If you decide to be in the study we will not tell anyone else what you say or do in the study. Your parents know about the study, but we will not tell them about what you say in the surveys.

You do not have to be in this study. No one will be mad at you if you decide not to do this study. Even if you start, you can stop later if you want. You may ask questions about the study.

If you decide to you want to be in this study, please sign your name.

I, _____, want to be in this research.
